Rocks News

Rocks, Dec. 5—Farmers here are busy sawing their winter wood, getting some tobacco ready for the market and killing their hogs.

Mrs. Richard Davis, of Pamplin spent last week-end with her sister, Mrs. R. C. Baldwin.

Mr. and Mrs. Victor Jones and children, of Newport News, spent last week-end with her parents, Mr. and Mrs. G. T. Marsh.

Mrs. Robert Roach spent Tuesday with her mother, Mrs. D. R. Inge.

Emory Ranson and Toby Inge, and a few more went to Lynchburg Thursday to give blood for R. L. Jennings.

R. L. Jennings was operated on Saturday morning.

Edward Ranson returned home from the hospital much improved.

Friends are sorry to hear that Mrs. Oddie Ranson was in a car wreck last week. We wish her a speedy recovery.

J. P. Ransone, Sr., of Norfolk was in the neighborhood last week visiting relatives.

Quite a few from Rocks attended the funeral of the Rev. G. A. Chesley left at Evergreen Sunday afternoon. Deepest sympathy is extended his wife and children.

Mr. and Mrs. Emory Ranson spent the week-end in Amherst with her parents, Mr. and Mrs. Reuben Garrett.

Mr. and Mrs. L. M. Williams and Steve, and her brother, Donald, of Waynesboro spent Sunday with Mr. and Mrs. Robert Roach.

Toby Inge was out looking for one of his small pigs Saturday night that left home Wednesday.

Winston Ranson was visiting Jene and Kenneth Baldwin, of Pamplin, recently.

Rev. Tearle Brown, a student in college, preached a very helpful sermon at Rocks Sunday night. A large crowd was out to hear him.

Emory Ranson celebrated his birthday Friday.

Mr. and Mrs. Richard Inge and Dianne Byrd, of Farmville, were visiting Mrs. D. R. Inge Sunday.

Mayo clinic says eczema may be caused by frustration.

Confined Flocks Make More for Poultrymen

Average 28 More Eggs Per Hen When Kept Up

Profitable chicken flocks usually lay about 20 per cent of their total yearly eggs during the last three months of the year. They produce one dozen eggs for each seven pounds of feed, have less than 12 per cent yearly mortality, and average 175 eggs or more per bird.

Here is how poultrymen may achieve such records with their fall-pullets and insure themselves a profit:

1. More money will be made if the flock is kept confined. Figure show that confined flocks lay 28 more eggs per hen than those given the run of the farm. If it is desired to turn the flock out for part of the day, it should be done in the late afternoon—on a clean, graveled yard.

2. Supply plenty of floor space. Three to four square feet for each bird is about right.

3. Use a built-up litter on your chicken house floor. In starting a litter, use straw, wood shavings, sawdust, peanut hulls, peatmoss or any dry material available.

A homemade grain chute set at a litter on an old truck makes quick work of feeding scratch to pullets on the Glendale poultry farm at Somerset, Mass.

Carbon Monoxide Formed

Carbon monoxide is the chief gas produced at this point. Though you may not realize it, this gas is flammable, and when a sufficient concentration of it is reached, the glowing tobacco can ignite it.

(2)—As the cotton or wool fibers begin to glow, more heat is produced. The additional heat distills more of the fibers. A kind of automatic acceleration process begins. The greater the heat, the greater the distillation; and the greater the growth of the fire. Under ideal conditions, the fire grows by geometric proportions.

According to the National Board of Fire Underwriters, the rate of chemical change in burning material doubles with every 18-degree F. rise in temperature. Thus at 1,112 degrees F., wood combines with oxygen at seven times faster than at room temperatures.

You can't stop smoking in bed. Science is against you.

(3)—The cigarette next burns its way down into a hole in the bedclothes. This, too, speeds the burning process. Here's why: When a cigarette is left in an ash tray or is held in the hand, most of its heat escapes into the air. But down inside the bedclothes, the wool forms an insulating barrier. The heat builds up. More fibers are distilled. More carbon monoxide is produced. The burning becomes more intense.

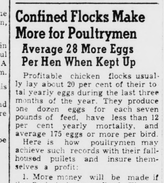
Inhales More Fumes

(4)—The little fire down in the bedclothes begins to have an effect on the smoker. Some of the carbon monoxide is burned and becomes carbon dioxide. The dioxide is not poisonous, but in high concentrations it is asphyxiating. When a person breathes it in, his lungs are stimulated into demanding more oxygen. The smoker breathes deeper and faster.

He inhales more of the deadly carbon monoxide, building up its concentration in the blood stream to a lethal level.

(5)—Another threat against his life appears. The oxygen in the room is being consumed, both by the fire and by his own deeper breathing. When the amount of oxygen supplying a fire runs low, the fire produces increasing quantities of carbon monoxide. This in turn greatly increases that danger of a flash fire engulfing the room.

When the room contains some quantity of flammable carbon monoxide, any new oxygen supply, such as from a slight breeze through a window, or a door opened suddenly, may be enough to set off a flash fire.



Harold Pirtle, of Sullivan, Ind., shown above, was winner of the 1949 "pocked area" wheat growing championship in a contest sponsored by Purdue University and the Southwestern Indiana Wheat Improvement association.

He produced an average of 57½ bushels of wheat per acre on an 11-acre field. His prize-winning wheat was Vigoo, the new stiff-strawed, heavy-yielding red winter wheat developed at Purdue.

Certified Seed Said Need for Good Crops

Only by purchasing certified seed can a farmer make certain he is getting the best product available, says Dr. R. P. Moore, director in charge of the North Carolina crop improvement association.

Dr. Moore says seed are unique in that their breeding cannot be determined from appearance alone. To determine in advance the type of crop which a particular lot of seed can produce, it is necessary to know the history of the seed.

In the production of hybrid corn, the plant breeder probably will know much about the performance of the proposed hybrid before it is actually produced. After it is produced, it is put through a series of tests.

Diseased Livestock Costs Farmer Millions Yearly

Millions of dollars are lost every year in diseased livestock. Less than a dozen diseases are causing unbelievable losses in cattle, calves, hogs and sheep.

Pneumonia and pleurisy are most common, with pyemia, or blood poisoning, in third place. Immasurity alone claimed over one-fourth of the more than seven million calves slaughtered annually, according to the report.

Champ Wheat Grower

Harold Pirtle, of Sullivan, Ind., shown above, was winner of the 1949 "pocked area" wheat growing championship in a contest sponsored by Purdue University and the Southwestern Indiana Wheat Improvement association.

He produced an average of 57½ bushels of wheat per acre on an 11-acre field. His prize-winning wheat was Vigoo, the new stiff-strawed, heavy-yielding red winter wheat developed at Purdue.

Doomed Horses Break Out Of Stable, Have Big Time

NEW YORK.—They were just four old nags awaiting in a shed outside a Long Island slaughterhouse. They had never pranced to the music of the strolling violins and saddles." They had never dipped their necks in the winner's circle for a garland of roses.

But no one knew what dreams were passing through their heads. Perhaps it was a dream of what might have been for them had things gone differently. Maybe it was a dream of the glory they never knew. It could have been the plain old curiousness that sometimes comes with old age.

But—

Whatever it was, it sent the four old nags breaking wildly out of the slaughterhouse stable and taking off across the countryside.

Lovely ladies didn't cast admiring glances at them. Instead, housewives took brooms to the old horses as they trampled shrubbery and pulled down clotheslines.

They led a pack of police for a time. But in the stretch the police had more foot than they did.

And instead of roses they got ropes around their necks and were led back to slaughter.

But they did get a glimpse—their last—of how the other half lives in a horse's world.

ThoseWhoSmoke In Bed Lay Up Odds on Tragedy

NEW YORK.—If the citizen who persists in smoking in bed ever realized the odds against his getting away with it alive, he'd most likely stop the practice.

According to research experts of the National Safety Council, smoking in bed sets up a chain reaction that kills most of its victims before they are burned or even feel the pain of heat. And setting off that reaction doesn't require the skill of an atomic scientist.

The NSC's researchers have found that the moment a lighted cigarette touches bedclothes a chain of molecular and chemical events begins that usually ends in disaster for everyone in the house.

Here's what happens, step by step, when a nodding smoker drops a cigarette into the bedding:

(1)—The cotton or wood around the burning cigarette is slowly heated to about 200 degrees Fahrenheit. This gradually distills flammable carbons from the cotton or wood fibers. Chemists call this process distillation, gasification or volatization—all the same.

High School Chatter

Well, folks, we thought it was so long mule train and hello to sleigh bells when we awoke Saturday morning but the snow left all too soon and there just wasn't enough anyway.

When we received our report cards Monday, we found out how true was the expression "Blue Monday." There were some setbacks and some improvements. Students, let's make the on-coming six weeks supreme in every way.

Our basketball teams were defeated by Pamplin Thursday night, but they don't give up. More power, boys and girls, the best of luck to you.

The V. H. I. Glee Club concert was a great success. It would be wonderful if our town could have more entertainment like this.

The Monogram Club presented "The Blue Coats Girl" and "The Variety Act" again for the benefit of the students who hadn't seen it. We saw some of our actors and actresses and also some comedians. The play was humorous and enjoyable.

The pictures which were taken for the annual were last week. How did you like yours?

Some of the Seniors didn't like theirs. These Seniors made a trip to Lynchburg to have their pictures taken.

The Eleventh Grade and Music Appreciation Class are practicing on the Christmas Pageant.

The Wood Sisters must like the new Plymouth. Whatchn say, Dick and Alfred, Mary Joyce, you are wearing a different class ring. Who could tell us about this?

Lizy, who was that Senior boy helping you up the slippery steps?

Ruby and Helen are having fun finding out the plans of the Seniors on their career, for a write-up in the annual. Have you Seniors really decided? How??

It won't be Christmas long enough — because Santa is coming soon. Until next week, so long.

MONROE LODGE

Monroe Lodge No. 301, A. F. & A.M., meets the second Monday of every month in their hall at Appomattox, at 8:00 P. M. Visiting brethren are income.

Class at 7:30 P. M. Thursday.

Corn Club Banquet Here Last Night

A banquet was held at the local high school cafeteria last night by the 100-Bushel Corn Club Members and Sponsors. The banquet was the climax of the corn contest between Virginia and North Carolina. A big effort to increase corn yields was staged this year, and produced very satisfactory results.

Among those speaking at last night's local banquet were R. B. Hudgins, James Pray, Eric Lund, R. D. Sears and E. W. Carson.

Cantata At Methodist Church Here

CANTATA—PAGEANT
AT MEMORIAL METHODIST CHURCH, DECEMBER 18

At 7:30 P. M. Sunday, December 18, the Cantata - Pageant, Christmastide will be presented at the Memorial Methodist Church here.

The Junior - intermediate Choir and the Youth Choir will sing the musical numbers. Pageant characters:

Christmastide, Miss Mary Alma Spiggle

The Star, Miss Faye Wood

The Angel, Miss Catherine Burge

Mary Margaret, Mrs. Grover Smith

Joan, her maid, Miss June Holt

Mary, the Madonna, Mrs. Clyde Moore

The Wise Men: Billy Conner, Harry Gordon Lawson and Sam Ferguson

The Shepherds: Olin Woodell, Ivey Helland, Mike Hudson, Newton Jennings and Billy Perdue

The Whistling Woodcutter, C. T. Mosen, Jr.

Pianists: Miss Kathryn Burkey, and Miss Rebecca Babcock

Soloists: Miss Faye Wood, Miss Catherine Burge, and Byron Babcock.

Christmas Windows

All business places are requested to leave lights on between the hours of 7 P. M., and 9 P.M., on December 20. The windows will be judged by a Garden Club committee at that time.

COUNTY 4-H COUNCIL ELECTS OFFICERS

On Friday, December 9th, the Appomattox County 4-H Club Council met at the home of Mrs. B. G. Anderson and elected the following officers for the Council:

President, Charles Harvey
Vice-pres., Shirley Mitchell
Secretary and treas., Ann Cabell
Song leaders, Dan Carson and Geraldine Lucado
Reporter, Thelma Mayberry.

WILBUN'S NEW STORE OPEN

The new store of R. E. Wilbun in Appomattox was opened to the public last night. It is located across from the former battery plant, now Appomattox Farmers' Supply. Mr. Wilbun has added new equipment, and carries a full line of grocery and kindred items.

Five million poor get yearly aid from U. S.

Most schools will close December 21 for holiday.

Five hundred billion seen as cost of a World War III.

Prove Dangers on Winter Roads

The State Highway Department today produced scientific evidence to support a winter-driving warning for motorists to exercise particular caution when pavement surfaces are wet and slippery.

The evidence came from a thorough-going study designed to determine the distance an automobile will skid at various speeds under wet and dry pavement conditions.

After making more than 1,000 measurements on 22 different pavement types at 10, 20, 30 and 40 miles per hour, the department's research engineers concluded that forward skidding distances are "much longer" on wet than on dry pavement surfaces.

At 40 miles per hour, the maximum skid distance on a dry pavement was 88.9 feet. At the same speed, on wet pavements, skid distances ranged to 234.5 feet.

In other words, the department said, your brakes simply don't hold as well when pavement surfaces are wet. And there's a lot of wet weather during winter months, a spokesman commented.

Chief purpose of the tests was to determine which types of highway pavement have the greatest "skid resistance." The department believes the information will be invaluable in planning future construction and maintenance.

Plan Improved Road System

Some 900 miles of Virginia highway are included in a proposed national system of interstate highways, the State Highway Department said this week.

The interstate network has been recommended by the U. S. Bureau of Public Roads for development to the highest standards, designed to provide safe and swift transportation between the nation's large centers of population.

The network, covering 37,000 miles in the 48 states, has been strongly recommended by the armed forces for development as part of a strategic network of defense highways.

The Virginia portion of the interstate network includes all of U. S. Routes 11 and 11. In addition, several important connecting routes are included.

The connecting routes are U. S. 60 from Hampton to Richmond; and from Lexington into West Virginia; U. S. 211 and State Route 55 from Washington to Strasburg; U. S. 301 from Pettersburg into North Carolina, and U. S. 250 from Richmond to Staunton.

Virginia road officials said these routes will be developed in accordance with the state's 20-year plan for road improvement in the state. The principal routes have been set up for ultimate development as four-lane divided highway and not-so-heavily traveled routes as two-lane heavy duty roads.

Already major improvements have been made on many of the roads with regular allocations of state highway funds and Federal aid funds.

CHRISTMAS PROGRAM AT HERMON CHURCH

There will be a Christmas program at Hermon Church December 22, at 8 P. M. The theme will be: "Stories of Christmas Carols."

FINE TOBACCO SALE

E. J. Marsh, of Route 3, was one of the Appomattox growers making fine sales of dark tobacco this week. On Monday Mr. Marsh sold 560 pounds of tobacco for an average price of 44.11.

This season marks the 58th consecutive year that Mr. Marsh has sold dark tobacco!

Post Office To Be Open Sunday P. M.

For the convenience of the public and to alleviate some of the anticipated rush next week, Postmaster E. LeRoy Smith has announced that the local Post Office will be open Sunday afternoon, December 18, between the hours of 1:30 P. M. and 4 P. M. It is hoped that patrons of the office will take this opportunity to purchase stamps, mail cards and packages.

Forest Service Aid is Used

The Burrus Land and Lumber Company recently had a block of young pine timberland marked by the Virginia Forest Service for a pulpwood thinning. The thrifty, fast growing trees were left for crop trees which will be harvested later as sawtimber. The crooked, forked and defective trees were marked for removal as pulpwood. Thinning concentrates the growth on a small number of trees and if correctly performed, improves the quality of the tree. The improved quality of the crop trees added to the returns received from the thinnings will always make thinning worthwhile wherever there is a market for pulpwood.

Christmas Seals

The Christmas Seal Committee has made the following appeal to the public:

"Are you getting the most out of Christmas? You know, Christmas is a very special time of the year. It's the time when the thoughtfulness of man for man, the spirit of giving rather than receiving, the unselfishness of all os us asserts itself. There's no better way to be sure of the Christmas spirit than by buying Christmas Seals. When you buy Christmas Seals you are helping to save lives, lives that might otherwise fall prey to that dread disease - Tuberculosis.

Total returns thus far from the county sale are $173.50

Girls' Team Wins Game

The A. H. S. girls' basketball team defeated Concord High School girls 30 to 23 in a game played at Concord Tuesday night. This was the first time the Concord girls had lost in two years. Barbara Johnson scored 23 points for Appomattox, with Beatrice Totty next with 5 points. On defense, Helen Mae Poe, Jean Goad and Barbara Carter played well.

The Appomattox boys lost out to Concord 43 to 33, showing considerable improvement over previous games. Sam Ferguson scored 23 points to be the outstanding player for Appomattox.

Harry Byrd, Jr. Will Propose School Change

State Senator Harry F. Byrd, Jr., representing Winchester, Frederick, Clarke and Shenandoah in the Virginia State Senate, issued the following statement this week:

"The public, I believe,should have a more direct voice in the operation of Virginia's school system. It needs to be brought closer to the people by revising the present indirect method of appointing the school boards.

"Believing as I do that the closer the school system can be brought to the people the more efficient it will be and the more public support it will command, I shall introduce a bill to the Legislature providing that the Board of Supervisors, the elected representatives of the people assume the powers and functions of the school board.

"I am making this statement prior to the convening of the General Assembly so there might be adequate discussion.

In the cities, the school boards are directly responsible to the governing body. But in the counties the school boards are appointed by the school trustee electoral boards, which in turn are appointed by the circuit judges who themselves are elected by the Legislature.

"The purpose of this indirect method was to remove the school system from politics by making the school board members independent of the electorate. But there is a sharp division of responsibility between the tax levying body and the school board.

"The Board of Supervisors has only an indirect responsibility for the operation of the school system; the school board has no responsibility whatsoever for the levying of taxes. Today more than 70 per cent (it some cases 90 per cent) of a county's budget is devoted to school purposes.

"If school patrons become dissatisfied there is no direct way in which they can act. The line of authority and responsibility is divided, hence none can be held accountable.

"By transferring to the Board of Supervisors the powers and functions of the school board, the responsibility for an efficient school system will rest squarely on the shoulders of the people of each county. The people elect the supervisors and the supervisors are responsible to the people.

"This plan serves a two-fold purpose, as I see it: One, it would give the Board of Supervisors increased power and prestige conducive to obtaining outstanding men; and, two, it would spotlight the responsibility for the handling of the school system.

"The group which levys the taxes and the group responsible for the efficient operation of the schools would be one and the same.

"The public would be faced with today's situation, where the school board has no authority to levy taxes and no responsibility to the electorate, and the supervisors have no direct responsibility in the handling of the school system.

"This proposal, of course, would not become effective until the voters have had an opportunity to elect a new Board of Supervisors in 1951.

"It is important, it seems to me, that public schools be brought closer to the people. I am convinced that this would make for greater efficiency in operation of the schools and that simultaneously the school system would command greater public support.

"Public education is a vital function of government; the voters, I believe, should have a direct voice."

Santa Claus In Appomattox This Saturday

The annual Santa Claus appearance in Appomattox, sponsored by the Appomattox Lions Club, will be held this Saturday afternoon, December 17. Announcement of the annual event was made this week by a special Lions Club committee.

All children are invited to meet Santa Claus in person, when he arrives on downtown Main Street. He is expected around two o'clock.

In keeping with past custom, old Santa is expected to bring a gift for each child.

Appomattox has taken on a holiday appearance. The corner of Main and Church Streets has been lighted with Christmas lights. Many homes are beginning to assume the yuletime appearance, and store windows are decorated. The Garden Club has sponsored a Christmas decoration of store windows.

A. H. S. Ready For Christmas Pageant Dec. 21

The annual Christmas Pageant, "The Light of the World," will be presented at the high school auditorium here on Wednesday, December 21 at 8 P. M.

A devotional service will be read by the Rev. J. Marshall Walker, and scenes of the Nativity will be presented, accompanied by a chorus of fifty voices. Solos will be rendered by Faye Wood, Ann Waller and Byron Babcock.

The public is cordially invited to participate in this devotional Christmas service.

The pageant is under the direction of Mrs. Wiley Morris and Miss Harriett Holley.

Presbyterian Christmas Program

At 5 P. M., Sunday, December 18, there will be a candle-light Christmas service in the Appomattox Presbyterian Church. The Carol Choir of Girls, directed by Miss Nancy Scott, will take part on the program, and Miss Scott will sing a carol assisted by a boy's choir. Congregational singing of Christmas hymns, reading of the Nativity Scriptures, a story, and a brief devotional will complete the program. Everyone is invited and will be cordially welcome.

Wingfield Baseball Mgr.

J. L. Dillow, president of the New River baseball club, has announced that Dick Wingfield, former assistant business manager of the Bluefield Blue Grays, has been named New River business manager for the coming year.

Wingfield, a native of Appomattox, Va., played football and baseball while attending Appomattox High School. Later he attended Hargrave Military Academy, where he won the school letter in baseball.

At Bluefield College, Wingfield was business manager of the college annual, "The Rambler." In addition he was sports editor of the school paper, treasurer of the Monogram Club, member of the debating team, treasurer of the MaMaison social fraternity and a member of various committees.
